EPA Reference No: CAA-02-2021-1455**

Dear Mr. Buettner:

On behalf of our client, we are submitting this Emission Test Plan (ETP) to comply with the USEPA Request for Information Pursuant to Section 114 of the Clean Air Act.

Currently, the site does not have a stack to measure emissions and our client does not have the funds to build a cover over the shredder and install a stack to perform the emission measurements at the stack due to reduce business. An alternative sampling methodology has been proposed to address the requirements for testing.

Based on 2018, 2019, 2020 and 2021 shredding rates, in 2022 the shredding rate is estimated to not exceed 10 tph or 80 tons per day.

Please review the ETP at your convenience and if you have any questions or concerns, please let us know.

Thank you.

Sincerely,
For Envirotactics, Inc.
